OBJECTIVE

Computer Science graduate with exposure to backend development, seeking an entry-level engineering role to grow into full-stack development.

EDUCATION

B.Tech in Computer Science and Engineering

APJ Abdul Kalam Technological University

KMCT College of Engineering

2022 - 2026

CGPA : 7.1

SKILLS

Technical Skills Python, FastAPI, SQL, HTML, CSS, Basic JavaScript,
Docker, Git, GitHub Actions

Soft Skills Teamwork, Problem Solving, Communication Skills

EXPERIENCE

Python Full Stack Developer Intern

Futura Labs

Aug 2026 - Present

Kozhikode, Kerala

PROJECTS

Vantage - A Real-Time Geolocation Framework for Excursion Safety (FastAPI, SQL, Google Maps API): Developed a real-time geolocation platform for large group excursions with live location tracking, map-based participant monitoring, and geofencing capabilities. Focused on improving participant coordination, safety, and real-time communication through location-aware features.

Backend Project (CI/CD & Automation) (Python, GitHub Actions): Built a backend application with automated testing and CI/CD workflows to practice software reliability and deployment automation. Implemented REST endpoints, health checks, and deployment pipelines using GitHub Actions.

Gesture-Controlled Claw Machine: Built a real-time arcade claw machine controlled entirely through webcam hand gestures. Implemented hand landmark tracking, pinch-gesture detection, collision mechanics, motion smoothing, and animated canvas rendering for interactive gameplay. Designed a neon arcade-style UI featuring collectible prizes, particle effects, and real-time joystick/claw control.

Voice Virtual Assistant with ElevenLabs (APIs, ElevenLabs): Created a voice-enabled AI assistant integrating APIs for reminders, information retrieval, and smart device control. Optimized language, tone, and speech speed settings to provide a natural and seamless voice interaction experience.

EXTRA-CURRICULAR ACTIVITIES

- Technical Lead –Karma 2026: Managed ticketing, workshops, and hackathon operations ensuring smooth execution.
- Active participant in [IEEE](#) and [Mulearn](#) communities
- Published research paper: "Vantage: A Realtime Geolocation Framework for Enhancing Coordination and Safety in Large Group Excursions."

CERTIFICATES

- [CS50X](#)
- [IBM Introduction to Software Development–Coursera](#)
