OBJECTIVE

Computer Science graduate (B.Tech, 2026) with hands-on experience in Python, Django, Django REST Framework, SQL, and REST API development. Built backend and full-stack projects involving database integration, real-time applications, third-party APIs, Docker, and CI/CD. Currently gaining professional exposure through a Graduate Apprenticeship at AAI and developing full-stack skills. Interested in contributing to real-world software projects while continuing to grow as a developer.

EDUCATION

B.Tech in Computer Science and Engineering

APJ Abdul Kalam Technological University, KMCT College of Engineering

2022 – 2026

CGPA: 7.1

Python Full Stack Development Course

Futura Labs

Aug 2026 – Present

SKILLS

Technical Skills: Python, FastAPI, Django, Django REST Framework, SQL, REST APIs, Data Structures & Algorithms (fundamentals), HTML, CSS, JavaScript, Bootstrap, Docker, Git, GitHub Actions (CI/CD), C

Soft Skills: Problem Solving, Teamwork, Communication, Adaptability, Quick Learning

EXPERIENCE

Graduate Apprentice

Sep 2026 – Present

Airports Authority of India (AAI), ATC Department

- Gaining practical exposure to ATC operations, including tower systems, radar-based surveillance, runway operations, and flight-route correction workflows.
- Observing CNS infrastructure and surveillance/navigation sensors, and gaining an overview of how these systems support airport operations.

PROJECTS

Vantage: Real-Time Geolocation Web Platform for Excursion Safety (Python, FastAPI, SQL, JavaScript, Leaflet, OpenStreetMap) [\[GitHub\]](#)

- Built the backend of a real-time web application as a FastAPI service with a SQL database, supporting live location tracking for large group excursions.
- Developed a map-based interface with Leaflet and OpenStreetMap for participant monitoring and geofencing.
- Tested the system live with 5–6 devices sharing their real-time locations on the map.
- Contributed to the development and documentation of the project, which was published as a research paper.

Task Management REST API (Django, Django REST Framework, SQLite) [\[GitHub\]](#)

- Built a REST API for creating, retrieving, updating, and deleting tasks using Django REST Framework.
- Implemented database models, serializers, and CRUD endpoints using Django ORM and DRF.

Nike Website Recreation (HTML, CSS, JavaScript, Bootstrap)

- Recreated a Nike-style responsive website with HTML, CSS, JavaScript, and Bootstrap, matching the original layout and styling.

- Implemented interactive elements using JavaScript.

Notes API: Dockerized Backend with CI (Python, Docker, GitHub Actions) [\[GitHub\]](#)

- Built a Python REST API for managing notes and containerized the backend using Docker.
- Configured a GitHub Actions CI workflow to automatically build the Docker image on every push.

Voice Virtual Assistant (Python, Third-Party APIs, ElevenLabs)

- Developed a Python-based voice assistant integrating third-party APIs for reminders, information retrieval, and smart device control.
- Configured language, tone, and speech settings to improve the voice interaction experience.

PUBLICATION & LEADERSHIP

- Published research paper: “Vantage: A Real-time Geolocation Framework for Enhancing Coordination and Safety in Large Group Excursions.”
- Technical Lead, Karma 2026: Managed ticketing operations, including bulk importing participant details and generating tickets for approximately 3,000 participants.
- Active participant in [IEEE](#) and [Mulearn](#) communities.

CERTIFICATES

- [CS50X](#)
- [IBM Introduction to Software Development - Coursera](#)
